Calarian, Zamboanga City, Philippines

## SUMMARY

**Senior Software Engineer** with expertise in **JavaScript, TypeScript, Python, Java** and proven experience building **scalable web and mobile applications** for **fintech, healthcare, e-commerce, and software agencies**. Skilled in **React, Next.js, Node.js, Django, GraphQL, and real-time systems**, with hands-on experience in **cloud infrastructure, CI/CD, databases, and secure API development**. Passionate about delivering **high-performance, user-centric solutions**, optimizing workflows, and driving impactful results in fast-paced, collaborative environments.

## SKILLS

Language: Javascript, Typescript, Python, Java

Frontend: React, Nextjs, React Native, Angular, Tailwind CSS, Material UI, Antd

Backend: Node.js, Express, FastAPI, Django, Flask, Ruby on Rails, GraphQL, REST APIs, WebSocket

Data & Messaging: PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Kafka, RabbitMQ, Spark, Snowflake

Cloud & DevOps: AWS (EC2, ECS, EKS, S3, RDS, SQS, Kinesis, ElastiCache, CloudFront), Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins, GitLab), Fastlane

Testing & Monitoring: Jest, Supertest, SonarQube, Sentry, LogRocket

Security & Auth: OAuth 2.0, JWT, TLS/mTLS, FHIR

Other: LaunchDarkly, Storybook, Agile/Scrum, Git

## WORK HISTORY

### 06/2024 - Present

San Francisco, CA, USA

#### Senior Software Engineer

##### Carbon Five

- Developed a **cloud-based API platform** with encrypted storage and automated **ETL pipelines**, which reduced reconciliation errors.
- Built a microservices architecture with **Kafka event streaming** and secure APIs, resulting in faster transaction process and improved compliance.
- Implemented **Redis** caching and refactored the frontend with **React**, achieving faster load time and increase in completed purchases.
- Built a **GraphQL** gateway with **resolver orchestration** and batched API calls, enabling live updates and reducing network overhead.
- Integrated real-time event tracking and analytics dashboards using **Kafka** and **Postgres**, enabling actionable insights that increased user engagement.
- Introduced automated device testing with **CI pipelines** and error monitoring tools, which reduced crashes by 60% and improved app ratings in app stores.

### 02/2022 - 05/2024

San Francisco, CA, USA

#### Senior Full Stack Engineer

##### Roostify

- Built a real-time notification system with WebSockets and **event-driven architecture**, which increased customer satisfaction scores and reduced support inquiries.
- Implemented **OAuth 2.0, JWT authentication**, and end-to-end encrypted communication channels, ensuring compliance with financial regulations and enabling safe collaboration.
- Refactored backend services, introduced caching with **Redis**, and optimized database queries, achieving 3x higher throughput and zero downtime during peak hours.
- Developed an **API integration layer** with automated data cleansing and synchronization, which reduced data errors by 60% and improved lender confidence in decision-making.
- Implemented a scalable **microservices architecture** with automated document verification and real-time status tracking, resulting in a 50% faster loan approval time and improved customer satisfaction.

### 07/2019 - 02/2022

Cebu, Philippines

#### Full Stack Developer

##### Coins.ph

- Optimized cloud infrastructure and implemented auto-scaling **microservices**, resulting in uninterrupted service despite a 3x increase in users During the COVID-19 surge.
- Introduced **multifactor authentication** and **real-time transaction monitoring**, reducing fraudulent activity by over 30%.
- Built **optimized APIs** and asynchronous processing for payments, cutting transaction time by half.
- Implemented automated **KYC** with **OCR** and AI-based document verification, reducing onboarding time from days to minutes.

## WORK HISTORY

06/2018 - 07/2019

Cebu, Philippines

Web Developer

**Medixus Health Solutions**

- Built a **real-time monitoring** dashboard for hospital administrators, improving operational decision-making and resource allocation.
- Optimized hospital database queries by refactoring complex **SQL procedures**, reducing report generation time from hours to minutes.
- Enhanced telemedicine video call quality by optimizing **streaming protocols**, leading to decrease in call disruptions during remote consultations.
- Automated lab results notifications through **API integration** with third-party labs, accelerating patient result delivery by 40%.

## EDUCATION

08/2010 - 05/2014

Manila, Philippines

Bachelor of Science in Information Technology

**Technological University of The Philippines**

08/2014 - 05/2018

Manila, Philippines

Master of Science in Information Technology

**Technological University of The Philippines**
